28th Jan. 2020, New Delhi

Indian Emerges Top Most Thought Leader On 'Digital Future' in Forbes Global Panel

We are pleased to announce that our Chief Analyst and Founder of '5 Jewels Research', Innogress, Mr. **Sumant Parimal** has been emerged as Top Most Thought Leader on '**Digital Future**' in a Global Panel of '**AI (Artificial Intelligence)** Experts hosted on-line by World's reputed **Forbes** magazine.

In duration of around three months of this 'on-line' experts' panel on '**AI**', in which reputed experts of 'IT' and '**AI**' from America, Europe, Asia, Australia have participated, and moderated by New York based Frank Kovacs, ratings of Mr. **Sumant Parimal** remained highest even in the last round of expert deliberations on theme '**Digital Future**', and Mr Sumant retained his **Top Most Expert Position**, which he acquired last month under stiff 'Knowledge Oriented' global peers rated competition.

He has been only Indian who featured as '**Top Most Rated Expert**' in this Global '**AI**' Experts Panel of **Forbes**, which deliberated on five emerging themes on '**AI**' and '**Digital Technologies**' till today.

In earlier years, Mr Sumant was also invited by **Oracle Corporation** to join its Global On-line Experts Panel on '**Blockchain Technology**' in which also he emerged as top-rated Global Thought Leader.

'AI' and 'Blockchain' are two Innovative Technologies which are emerging very fast, and there is race among super powers of the World to take early leadership in these innovative technologies.

In this scenario, emergence of an Indian thought leader in new '**AI**' and '**Blockchain**' Technologies as **Top Most Thought Leader** in Global Platforms demonstrates potentials of India in leading in new Tech. Innovation, which shapes our future economy.

In his concluding remarks in Forbes Panel, Mr Sumant said "**AI is going to have higher Economic Value leading people and enterprises to perform more in less efforts or resources. 'AI' is going to change how we even account our nation's GDP, as more and more economic value gets created from hidden codes and 'AI' Algorithms, So higher deployment and utilization of 'AI' in Enterprises, Businesses, Government and people's daily life means higher value add in lesser time, hence adding higher GDP value in our Economy.**"

Mr. Sumant can be contacted for a focused interview or analyst perspective on pr@innogress.com .
