

5Jewels Research (5JR) Press Release

“India Need To Give Over 6 Billion Decision Making To Robots”- A.I. Expert

29th Oct. 2021, New Delhi

As per Analyst of [5Jewels Research](#) , India (Govt., Pvt. & Other Entities) may need to give over 6 Billion decision making to Robots for faster economic growth, and it is also required as decision making going to be more complex.

While speaking in [WORLD INTELLIGENT ROBOTIC PROCESS AUTOMATION SUMMIT](#) today, Chief Analyst of **5Jewels Research** Mr. [Sumant Parimal](#) said “Many decisions and activities which are repetitive in nature are good candidates for automating through Intelligent RPA (Robotics Process Automation) for increasing productivity, reducing delays and errors. In India, level of automation is still at basic level where many decisions making in various processes and activities are taken manually, which hampers speed of value delivery and further throttles our economic growth. Also, decision makings are going to be more complex due to lots of content, context and data needs to be taken into consideration. Due to these reasons, **India need to give over 6 Billion Decision Making to Robots for faster economic growth**”.

“India need to deploy over 150 Million Robots-BOTs for automating these 6 Billion Decision making in next few years” Mr Sumant Parimal added further while addressing many Global A.I. and Tech. Professionals who attended this On-Line RPA Summit.
